

Personal Protective Equipment

Respiratory Protection

Respirators, single use

S7

ActivForm® Seal giving an optimum fit without adjustment. DuraMesh® Design to resist respirator collapse. Nose flange for additional comfort and fit. Clip on head strap for ease of use. Revised EN 149: 2001, it was decided to combine the two categories 'S' and 'SL' into just one category. These now offer protection against dusts, fumes and water/oil based aerosols.

Catalogue No	Alt. No	Description	Pack qty
SAT-115-020P	2380	Respirator FFP1	20
SAT-115-040J	2385	Respirator FFP1 valve	20

Respirators, dust, mists and metal fumes, 8000 series

S7

Dusts, mists and metal fumes are the most common respiratory hazards in the working environment as by-products of processes such as grinding and mixing. 3M respirators provide comfortable, maintenance free protection against these particular hazards.

Catalogue No	Description	Pack qty
1 SAT-400-130V	8710E dust respirator, provides comfortable, effective respiratory protection against fine dust; the convex shape, twin strap design and nose clip ensure a good fit over a wide range of face sizes. EN 149: 2001 FFP1 Particulates Assigned Protection Factor: 4 (NPF 4)	20

Catalogue No	Description	Pack qty
2 SAT-400-145Y	8810 dust/mist respirator, provides comfortable, effective respiratory protection against fine dusts and water based mists; the convex shape, twin strap design and nose clip ensure a good fit over a wide range of face sizes. EN 149: 2001 FFP2 Particulates Assigned Protection Factor: 10 (NPF 12)	20

Catalogue No	Description	Pack qty
3 SAT-400-150P	8812 valved dust respirator, provides comfortable, effective respiratory protection against fine dust; the convex shape and exhalation valve reduce heat build up to provide comfortable protection particularly in hot and humid conditions. EN 149: 2001 FFP1 Particulates Assigned Protection Factor: 4 (NPF 4)	10
