

Capillary columns, Thermo Scientific TRACE TR-5

16

NEW

- Ideal start for method development
- High operating temperature
- Wide variety of applications

The Thermo Scientific TRACE TR-5 5% phenyl column is a non-polar low bleed column with a slight increase in polarity compared with the 100% methyl columns. A universal column used in a wide range of applications such as alcohols, free fatty acids, aromatics, flavours and low polarity pesticides. This phase is extremely low bleed with a maximum operating temperature of 350°C.

Technical Specification

Phase	5% phenylmethylpolysiloxane
Temperature, max., °C	340/350 ($\leq 1.5\mu\text{m}$ films) 280/300 ($> 1.5\mu\text{m}$ films)
USP category	G27, G36, G41

Catalogue No	Alt. No	Column I.D., mm	Film thickness, μm	Length, m
GCH-605-010U	260E130P	0.25	0.25	15

Capillary columns, Thermo Scientific TRACE TR-5MS

16

NEW

- Silphenylene phase
- Lowest bleed, highest stability
- High signal-to-noise increases sensitivity
- High robustness to oxygen and water contamination

The Thermo Scientific TRACE TR-5MS is a silphenylene-based phase ideal for all GC/MS applications. The non-polar low bleed column with a slight increase in polarity compared with the 100% methyl columns. A low bleed column is especially important for MS as contamination of source components will quickly lead to a degradation of results and costly instrument downtime.

Technical Specification

Phase	5% phenylpolysilphenylene-siloxane
Temperature, max., °C	360/370 ($\leq 1.5\mu\text{m}$ films) 350/360 ($> 1.5\mu\text{m}$ films)
USP category	G27, G36, G41
