CRY-700-130V	431131	Reusable polypropylene vial rack, holds 50 vials, self-locking design	-	2

## Vials, cryogenic, polypropylene, Cryule®

03

Externally threaded, these polypropylene vials and caps are freestanding on the bench and lock into the specially designed rack for one handed cap removal. The unique 50 position rack securely locks freestanding Cryule® vials in place and is made of durable autoclavable polypropylene and allows easy sample identification with an alpha-numeric index on top of each rack. Moulded corner posts provide stability when stacking (remove non-skid feet inserts). Non-skid feet offer additional stability for benchwork.

Note: Cryogenic vials to be used in gas phase of liquid nitrogen only.
