### Agarose, high EEO Protein Electrophoresis grade

Immunoelectrophoresis (IEP). Crossed-IEP. Counter-  
Immunoelectrophoresis (CIEP). Serum protein  
electrophoresis.

32

Catalogue No  
**BPE162-100**

Quantity  
100g

#### Product specification

|                      |                       |
|----------------------|-----------------------|
| Gelation temperature | 34.5 to 37.5°C        |
| Gel strength         | >650g/cm <sup>2</sup> |
| Sulfate content      | <0.15%                |
| EEO (-Mr)            | 0.23-0.26             |
| Moisture content     | <10%                  |
| DNase                | Not detected          |
| RNase                | Not detected          |

### Agarose, high gelling temperature DNA grade

Designed to produce high gel strength at lower  
concentration for large DNA.

32

#### Product specification

|                      |                       |
|----------------------|-----------------------|
| Gelation temperature | <40.5 to 43.5°C       |
| Gel strength         | >800g/cm <sup>2</sup> |
| Sulfate content      | <0.15%                |
| EEO (-Mr)            | <0.1                  |
| Moisture content     | <10%                  |
| DNase                | Not detected          |
| RNase                | Not detected          |

### Agarose IEF grade

Highly purified agarose for separating proteins by  
isoelectric focusing. Extremely low EEO.

#### Product specification

|                      |                       |
|----------------------|-----------------------|
| Gelation temperature | <45°C                 |
| Gel strength         | >500g/cm <sup>2</sup> |
| Sulfate content      | <0.20%                |
| EEO (-Mr)            | Not detectable        |
| Moisture content     | <10%                  |

### Agarose low-EEO multi-purpose, Molecular Biology Grade

Routine electrophoresis of DNA and RNA; wide  
resolution range 500bp to 23kb. High gel strength  
ideal for Southern and Northern blotting. PCR >1kb.  
Immunoprecipitation techniques. Baculovirus screening.  
Colony lifts.

| RNase                | Not detected            |

### Agarose, low melting Molecular Biology grade

Original low melting temperature agarose. NA  
separation from 200bp to 25kb. Preparative DNA and  
RNA electrophoresis. Ideally suited for DNA and RNA  
recovery. Cloning of tissue culture cells and viral plaque  
assays. Nucleic acid recovery.

Quantity  
25g

#### Product specification

|                      |                       |
|----------------------|-----------------------|
| Melting temperature  | <65°C                 |
| Gelation temperature | <26° to 30°C          |
| Gel strength         | >200g/cm <sup>2</sup> |
| Sulfate content      | <0.10%                |
| EEO (-Mr)            | <0.10                 |
| Moisture content     | <10%                  |
| DNase                | Not detected          |
| RNase                | Not detected          |

### Agarose, low melting for <1kb DNA Genetic Analysis grade

Low melting temperature agarose. Certified recovery of  
small NA fragments. Outstanding resolution of PCR and  
RT-PCR fragments from 50 to 1000bp. In gel PCR. In-gel  
ligations/transformations.
